

EFV*C/BCS2

Air Handlers

A key component of your home comfort system.

Many factors combine to create the perfect home environment. Temperatures must be consistent, humidity levels carefully balanced, and noise levels kept to a minimum. AirEase air handlers work with your air conditioner or heat pump to deliver a steady flow of cool air, with ideal humidity and quiet, energy-efficient operation.

Indoor Air Handler Models – EFV*C/BCS2

Efficiencies from 13 to 18 SEER can be achieved when matched with appropriate outdoor models
5-year limited warranty* – parts

Comfort Enhancements	
Quiet, Consistent, Reliable	AirEase air handlers equipped with variable speed motors help maintain consistent and even airflow . The variable speed motor featured on the EFV model gradually increases speeds from low to high. This helps keep noise levels to a minimum, remove humidity and enhance air quality . Both direct drive and variable speed motors are engineered to perform and built to last , so you and your family can always enjoy a cool and comfortable home.
Energy Efficiency	The addition of an AirEase air handler improves the efficiency of your air conditioning . For example, an air conditioner and heat pump matched with a variable speed blower motor consumes two-thirds less energy than a standard motor. So you can spend less on utility bills and enjoy more cool indoor comfort.†
Quality Construction	AirEase air handlers are equipped with quality components that are built to last longer for maximum performance. Drain pans are designed with a heat-resistant polymer that will not rust or corrode and is suited for today's high tech ultraviolet coil cleaning lights . Drain pans are also treated with Microban® antimicrobial protection , an additive that inhibits the growth of odor-causing mold, mildew and bacteria . For easier servicing and cleaning , all coil sections are lined with foil faced insulation.
More Choices	AirEase air handlers are available in a variety of configurations, capacities and efficiency levels to perfectly match your air conditioner or heat pump. Air handlers are compatible with R-22 refrigerant or the new ozone-friendly R410A refrigerant . Simply ask your Independent AirEase dealer which model is right for your home.

* See your local Independent AirEase Dealer for complete details regarding warranty coverage.

† Actual cost savings may vary depending on personal lifestyle, system settings, equipment maintenance, local climate, actual construction, installation of equipment and duct system, hours of operation and local utility rates.

Proper sizing and installation of equipment is critical to achieve optimal performance. Split system air conditioners and heat pumps must be matched with appropriate coil components to meet ENERGY STAR criteria. Ask your contractor for details or visit www.energystar.gov.
