

Welcome to the Great Indoors thanks to high-efficiency gas furnaces

The Echelon™ 8.T & 9.T Series 80% & 92%+ Efficiency

The Indoor Outfitters™

Coleman® Echelon™ 8.T & 9.T series furnaces

The Great Indoors comes in two stages

For maximum home comfort, Echelon T series two-stage furnaces are designed with the same attention to detail and style found in every Echelon home comfort system.

Year-round reliable energy efficiency

The Echelon T series furnace utilizes two-stage technology to provide two levels of heating performance. It operates on a low stage up to 85% of the time. Only on those bitter cold days does it require second stage. And, when you add in its ability to run for longer periods of time at lower fan speeds, the result is fewer temperature swings, increased air circulation, better indoor air quality and fewer noisy start and stop cycles.

Designed to keep you in your comfort zone

Conventional furnaces must be sized to heat your home on the coldest days of the year. Since they can only operate at full capacity they must cycle on and off more often, resulting in temperature swings that can be up to 6 degrees from your ideal setting! Echelon T series furnaces can operate more efficiently for longer periods of time, while delivering just the needed amount of heat. That keeps home temperatures much more even and well within your comfort zone.

Improving the air of the Great Indoors

By operating at lower fan speeds for longer periods of time, T series furnaces filter the air more often, removing more dust and irritants from the air. Longer cycles can also improve the performance of other components of your home comfort system by controlling humidity and improving indoor air quality.

Better Gear

for Comfort and Style

Turning your home into the Great Indoors makes owning an Echelon™ T series two-stage furnace a great decision

- T series promotes more even temperatures for greater home comfort
- Insulated cabinets for reduced noise levels
- Fewer starts and stops extends furnace life

An Echelon system for any home, anywhere

Echelon 9.T Furnaces

Coleman® has the right gear for all seasons

The Great Indoors from Coleman® HVAC is all about being environmentally conscientious and reliable. It's part of a total comfort system of Echelon furnaces, heat pumps and air conditioners designed to deliver the best efficiency, the quietest operation and the easiest serviceability.

Echelon air conditioners offer up to 15+ SEER energy efficiency. And with WhisperDrive™ technology and scroll compressors, they're up to 4 times quieter and 60% more efficient than standard models. Echelon heat pumps are designed with "Hot Heat" pump technology that provides discharge temperatures that are warm to the touch. The sleek design of these units are a natural fit in any environment.

You can also count on Coleman® HVAC to provide all the necessary filters and advanced controls to complete your system.

To help maintain the Great Indoors a variety of Indoor Air Quality products and the Talking Thermostat™ are also available. Now you can program your Coleman® home comfort system with help from audible instructions at the touch of a button. A contractor's contact information is also available, right at your fingertips.

Financing plans geared to work for you

Ask your Coleman® HVAC dealer about Easy Financing options. Applying takes just minutes, and, upon approval, you'll enjoy

low monthly payments, special financing offers, and no annual fee. Keep your family in comfort year-round...apply and buy a Coleman® HVAC unit with your easy-financing credit card today!
