

Whirlpool® Energy-Efficient 13 SEER & 14 SEER Air Conditioners

Create a Cool Oasis

W2C3 & W2C4 Series

W2C3 13 SEER & W2C4 14 SEER Whirlpool® Air Conditioners

- A Heavy-Duty, High-Efficiency Compressor with R22 Refrigerant**
Achieves an energy rating of 14 SEER for the W2C4 Series and 13 SEER for the W2C3 Series, respectively, using R22 refrigerant.
- B Large Diameter, All-Aluminum Condenser Fan and PVC-Coated Wire Discharge Fan Grille**
Provides better corrosion resistance and more efficient air delivery.
- C Rounded Corners**
Offer safety and an attractive, clean appearance.
- D Enhanced Aluminum Fins and Copper Tubing**
Maximizes heat transfer and airflow to reduce energy consumption.
- E High Performance Filter Drier**
Provides superior refrigerant system protection.
- F Solid Brass Service Valves with External Gauge Ports**
Located outside of the unit for easy installation and service.
- G Durable, Galvanized, Pre-Painted Steel Cabinet**
Offers a long-lasting, high-quality finish that resists weather, scratching and rust.

ENERGY STAR® rating applies to select models. See individual product specifications. All specifications are subject to change. All specifications are subject to change.

Start Every Day Feeling Great

As temperatures climb throughout the day, depend on your Whirlpool® air conditioner to deliver reliable cooling throughout every room. Whirlpool® air conditioners provide the durability, efficiency and reliability you'd expect from the world's number one brand in home appliances.

Seasonal Energy Efficiency Ratio (SEER) Rating to Cost Savings Comparison Chart*

What is SEER?

The efficiency of air conditioners and heat pumps is determined by the SEER rating. The higher the rating, the more energy efficient the product is and the greater the potential for savings on energy costs. If your air conditioner is more than 10 years old, it most likely has a SEER rating of 10 or less.

The chart above shows examples of potential energy savings. For every \$100 spent to cool your home with an 8 SEER air conditioner, a 13 SEER air conditioner would cost you

approximately \$62, while a 14 SEER would cost approximately \$57. Actual savings will depend upon the efficiency of your current system. To figure specific savings information for your household, use the energy calculators and software at the energysavers.gov website.

Also, check to see if your local utility company offers a rebate program for the purchase and installation of an ENERGY STAR® qualified air conditioner.

*The SEER to Operating Cost Comparison is for illustrative purposes only. Your energy savings may vary due to equipment installation, climate conditions, utility rate programs and/or your lifestyle.

WELCOME TO THE WHIRLPOOL® ECOCENTRAL™ LIVING SYSTEM

Maintaining an eco-conscious home doesn't mean you have to sacrifice comfort. Every Whirlpool® HVAC product family features EcoCentral™ functions related to home comfort, home health, energy consumption and money savings.

Save Energy and Money with a Whirlpool® EcoCentral™ Living System

EcoCentral™ living system products are designed to promote efficient and healthy living spaces. These products meet or exceed industry standards and carry at least one environmentally friendly feature, such as:

- Use of chlorine-free R410A refrigerant
- A 14 or above SEER rating for air conditioners and heat pumps or a 90% or greater AFUE rating for gas furnaces
- A hybrid heating system with the dual fuel capabilities of a heat pump and a gas furnace
- The promotion of healthy indoor air through an indoor air quality product that provides air filtration, moisture removal and antibacterial ultraviolet light protection
- The efficient use of energy to circulate warm or cool air throughout your home for improved comfort

If your current cooling or heating system is more than 10 years old, upgrading to an eco-friendly system will not only reduce your family's energy use, but can also help you save money on utility bills. Talk to your Whirlpool® Home Cooling & Heating dealer about which high-efficiency products are the best options for your home.

Reliable HVAC products from the brand renowned for making your life easier and more efficient every day
