

Whirlpool Gold® High-Efficiency 13 SEER & 14 SEER Air Conditioners

Keep Your Cool

W4GC3 & W4GC4 Series

W4GC3 13 SEER & W4GC4 14 SEER Whirlpool Gold® Air Conditioners

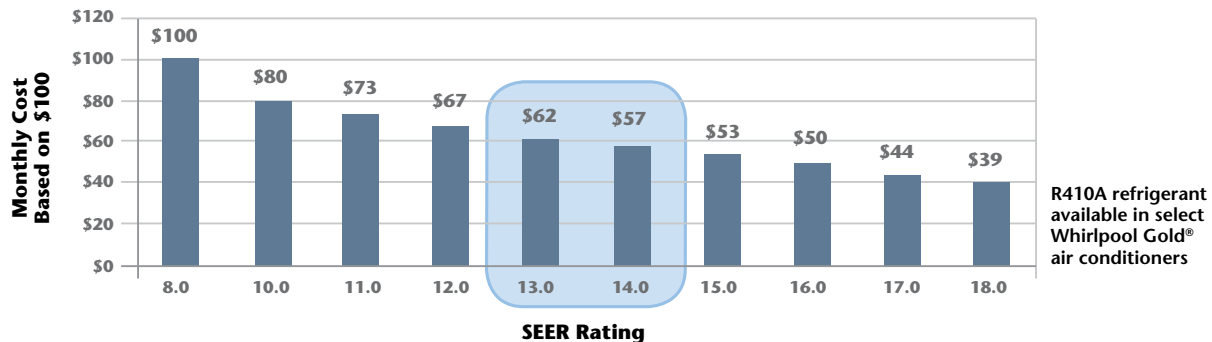

- A Heavy-Duty, High-Efficiency Compressor with R410A Refrigerant**
Achieves an energy rating of 13 or 14 SEER, respectively, using environmentally friendly refrigerant R410A.
 - B Enhanced Aluminum Fins and Copper Tubing**
Maximizes heat transfer and airflow to reduce energy consumption.
 - C Louvered Cabinet**
Removable panels provide easy access and cleaning.
 - D Rounded Corners**
Offer safety and an attractive, clean appearance.
 - E High Performance Filter Drier**
Provides superior refrigerant system protection.
 - F Durable, Galvanized, Pre-Painted Steel Cabinet**
Offers a long-lasting, high-quality finish that resists weather, scratching and rust.
- Sound Attenuating Compressor Blanket**
Reduces noise levels for quiet operation.
- ENERGY STAR® rating applies to select models. See individual product specifications. All specifications are subject to change.

Beat the Heat & Stay Inside

Feel immediate relief as you step inside. Thanks to your Whirlpool Gold® air conditioner, cooling comfort flows through every room. With the durability, efficiency and

reliability you'd expect from the world's number one brand in home appliances, your family will stay cool and comfortable when it counts the most.

Seasonal Energy Efficiency Ratio (SEER) Rating to Cost Savings Comparison Chart*

What is SEER?

The efficiency of air conditioners and heat pumps is determined by the SEER rating. The higher the rating, the more energy efficient the product is and the greater the potential for savings on energy costs. If your air conditioner is more than 10 years old, it most likely has a SEER rating of 10 or less.

The heart of the W4GC3 and W4GC4 Series air conditioners is the dependable, energy-efficient compressor that achieves an energy efficiency rating of 13 or 14 SEER, respectively. In addition, the compressor is designed to work with the environmentally friendly refrigerant R410A. This chlorine-free refrigerant is not only better for the environment, it also transfers heat more efficiently. The chart above shows examples of potential energy

savings. For every \$100 spent to cool your home with an 8 SEER air conditioner, a 13 SEER air conditioner would cost approximately \$62, while a 14 SEER would cost approximately \$57. Actual savings will depend upon the efficiency of your current system. To figure specific savings information for your household, use the energy calculators and software at the energysavers.gov website.

Also, check to see if your local utility company offers a rebate program for the purchase and installation of an ENERGY STAR® qualified air conditioner.

*The SEER to Operating Cost Comparison is for illustrative purposes only. Your energy savings may vary due to equipment installation, climate conditions, utility rate programs and/or your lifestyle.

WELCOME TO THE WHIRLPOOL® ECOCENTRAL™ LIVING SYSTEM.

Maintaining an eco-conscious home doesn't mean you have to sacrifice comfort. Every Whirlpool® HVAC product family features EcoCentral™ functions related to home comfort, home health, energy consumption and money savings.

Save Energy and Money with a Whirlpool® EcoCentral™ Living System

EcoCentral™ living system products are designed to promote efficient and healthy living spaces. These products meet or exceed industry standards and carry at least one environmentally friendly feature, such as:

- Use of chlorine-free R410A refrigerant
- A 14 or above SEER rating for air conditioners and heat pumps or a 90% or greater AFUE rating for gas furnaces
- A hybrid heating system, with the dual fuel capabilities of a heat pump and a gas furnace
- The promotion of healthy indoor air through an indoor air quality product that provides air filtration, moisture removal and antibacterial ultraviolet light protection
- The efficient use of energy to circulate warm or cool air throughout your home for improved comfort

If your current cooling or heating system is more than 10 years old, upgrading to an eco-friendly system will not only reduce your family's energy use, but can also help you save money on utility bills. Talk to your Whirlpool® Home Cooling & Heating dealer about which high-efficiency products are the best options for your home.

HomeWise® Heating & Cooling Limited Warranty

When an authorized Whirlpool Gold® dealer installs your factory-approved Whirlpool Gold® Heating and Air Conditioning system, we'll include our HomeWise® consumer protection plan. If your Whirlpool Gold® unit should fail in the first five (5) years due to a compressor or gas furnace heat exchanger failure, we will furnish a comparable model.

The HomeWise® consumer protection plan requires registration.
Registration information is available at www.whirlpoolhvac.com/homewise or see your dealer for details.

The logo for HomeClimate Protection Plus features a stylized house icon to the left of the text 'HomeClimate' in a large, bold, sans-serif font, with 'Protection Plus' in a smaller, italicized font below it.

Ask about this additional warranty coverage available.

5 Year Limited Warranty
On 13 & 14 SEER parts.
Whirlpool Gold® series.
See manufacturer's warranty for details.

10 Year Limited Warranty
On 13 & 14 SEER compressor.
Whirlpool Gold® series.
See manufacturer's warranty for details.
