

Echelon™ Series Premium Air Cleaners

Every Moment Deserves Coleman® Comfort

Indoor air quality solutions for your comfort

Cleaner Air for a Healthier Way of Life

Do you or someone in your family suffer from allergies?

The air quality of your home could be contributing to those itchy eyes and sneezing fits. Mold spores, pollens, and smaller particles like pet dander, dust and bacteria are all freely floating about your home. It doesn't matter how often you may vacuum or dust, as these microscopic pollutants require an air cleaner to block them from being circulated around your home. Fortunately, there's an easy solution.

One Air Cleaner for Your Entire Home

Whole house air cleaners, like our media and electronic offerings, dramatically improve your indoor air quality—all from one centralized location in your home. Single room air cleaners, on the other hand, can be expensive and are limited to the room you are in. In order to maximize your air filtration, you would need to purchase a unit for each room in your house. They also waste energy, require routine maintenance, and not to mention the increase in your utility bill.

Echelon™ air cleaners are an affordable choice for all homeowners who have a central home comfort system. These units integrate with your existing heating and cooling system, so they clean the air throughout your entire home, delivering 24-hour filtration when you need it. In addition to being highly efficient, they require less maintenance. There's also the year-long benefit of a cleaner home with reduced triggers for allergies and asthma attacks. So you and your family can breathe easier.

Dust, pollen, mold, bacteria and pet dander can easily set up camp in your home, making it up to 100 times more polluted than the air outside, according to the EPA.

Respirable Dust
Size (micron) .35-1
Efficiency 94%*

Bacteria
Size (micron) .35-10
Efficiency 94%*

Mold Spores
Size (micron) 3-10
Efficiency 99%*

Pet Dander
Size (micron) 1-10
Efficiency 98%*

Pollen
Size (micron) 5-100
Efficiency 99.5%*

**Efficiency ratings apply to the Echelon™ Premium Hybrid Electronic Air Cleaner 3000.*

ort and health

Echelon Media Air Cleaners

Echelon media air cleaners have a MERV 10 (Minimum Efficiency Reporting Value) rating and remove 97% of particles ranging in size from 3.0 microns to 10.0 microns, helping to reduce the risk of asthma and allergy attacks. Echelon media air cleaners also remove 70% of all mold and spore-sized particles, reducing problems with mold-induced illnesses. Plus, they operate silently without using any electricity or producing ozone. Maintenance is low with filter replacement every one to two years.

Echelon Electronic Air Cleaners

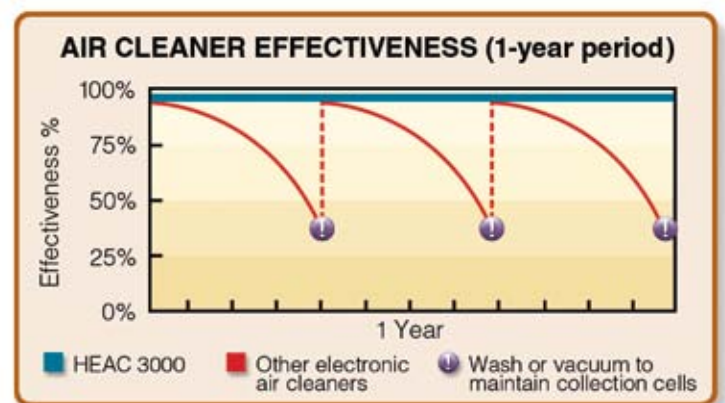

The Echelon Premium Hybrid Electronic Air Cleaner 3000 (HEAC 3000), one of our featured electronic air cleaners, **traps and kills spores, viruses, and bacteria** using a super efficient filtration system.

First, the particles pass through a control electrode and then through an electric field, where they become positively charged. The charged particles are then attracted to and trapped like a magnet in a generous 72 square feet of air filter media—making our air cleaner that much more effective. Echelon Premium Hybrid Electronic Air Cleaners are easy to install and offer all the benefits of an Echelon media air cleaner and more.

Echelon HEAC 3000 Benefits

The Echelon Premium Hybrid Electronic Air Cleaner 3000 is equivalent to a MERV 16 efficiency rating—the highest MERV rating achievable. The Echelon HEAC 3000 stops particles as small as .3 microns. It's ideal for anyone sensitive to airborne viruses, mold particles, allergy sufferers, and those who just want cleaner air.

- Captures 98% of particles down to the size of one micron without losing its effectiveness.
- Permanently traps and kills captured bacteria and spores.
- Service only once a year with no washing or vacuuming.
- According to an independent lab test, the Echelon HEAC 3000 offers the best performance, serviceability, and HVAC resistance.
- Close to 100% air cleaner effectiveness over a one-year period as compared to other electronic air cleaners, which drop off repeatedly throughout the year and require multiple servicings. The Echelon HEAC 3000 only requires maintenance once during the year—a simple five-minute process. (See chart below)

Coleman® Echelon™ Series Premium Air Cleaners

Model	Description	Efficiency Rating
Echelon™ Media Air Cleaner		
S1-WHM10162505C	16" x 25" Expandable Media Air Cleaner	MERV 10
S1-WHM10202505C	20" x 25" Expandable Media Air Cleaner	MERV 10
Echelon™ Hybrid		
S1-HEAC3000C	Premium Hybrid Electronic/ Media Air Cleaner	Equivalent to MERV 16

Comfort with a Conscience

It seems as if everyone is trying to be “green” today. At Coleman®, we’ve got a longstanding heritage with the environment that began over 100 years ago, the moment we lit our first outdoor lantern. Since then, generations of families have depended on rugged, reliable Coleman® products to bring them comfort—whether in the great outdoors or indoors.

Today, many companies offer a “green” or “sustainable” solution, but most often, you have to pay a premium. Coleman® believes in accessible sustainability—where everyone can have peace of mind with affordable, environmentally-friendly products. Through Coleman® innovation, you’re getting more performance in less space while using less energy, fewer raw

materials and less refrigerant. Our air conditioners offer one of the smallest footprints in the industry and are available with non-ozone depleting R-410A refrigerant. Coleman® modulating gas furnaces feature not only a reduced size, but also the highest fuel efficiency rating in the industry. Plus, many of Coleman®’s products have earned ENERGY STAR® certification. When you can bring all this value, and still be affordable, that’s accessible sustainability!

When you see the Coleman® logo, you know you’re investing in more than a reliable home comfort system. You’re investing in the sustainability of the environment. Your environment. We call it comfort with a conscience.
