R1500X RESIDENTIAL IN-DUCT UV PURIFIER

R3500X RESIDENTIAL / LIGHT COMMERCIAL IN-DUCT UV PURIFIER

As the airflow passes through the R1500X and the R3500X's Reflective Tube, the patented Sanuvox process destroys the contaminants that would have otherwise been distributed throughout the ventilation system. Both the R1500X and R3500X use a split UV-C / UV-V (germicidal / oxidizing) lamp to destroy viruses, kill bacteria, eliminate mold and neutralize chemical and biological contaminants such as cooking odors and cigarette smoke. The R1500X is designed to purify up to 1500 square feet and the R3500X is designed to purify up to 3500 square feet.
