

Whirlpool Gold® High-Efficiency 18 SEER Air Conditioner & Heat Pump

The Best of Both Worlds

(highest efficiency and complete comfort)

W4GC8 Series Air Conditioners
& W4GH8 Series Heat Pumps

ecocentral[™]
living system

WELCOME TO THE WHIRLPOOL® ECOCENTRAL™ LIVING SYSTEM

Maintaining an eco-conscious home doesn't mean you have to sacrifice comfort. Every Whirlpool® HVAC product family features EcoCentral™ functions related to home comfort, home health, energy consumption and money savings.

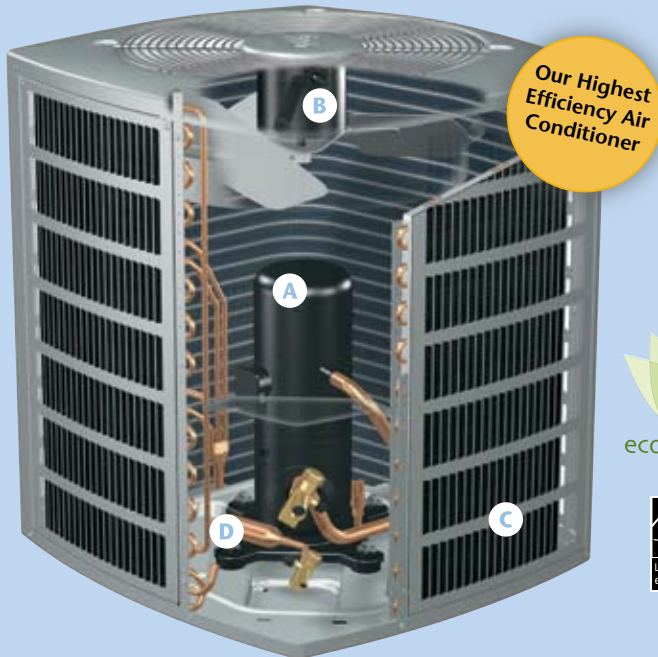

Save Energy and Money with a Whirlpool® EcoCentral™ Living System

EcoCentral™ living system products are designed to promote efficient and healthy living spaces. These products meet or exceed industry standards and carry at least one environmentally friendly feature, such as:

- Use of chlorine-free R410A refrigerant
- A 14 or above SEER rating for air conditioners and heat pumps or a 90% or greater AFUE rating for gas furnaces
- A hybrid heating system with the dual fuel capabilities of a heat pump and a gas furnace
- The promotion of healthy indoor air, through an indoor air quality product that provides air filtration, moisture removal and antibacterial ultraviolet light protection
- The efficient use of energy to circulate warm or cool air throughout your home for improved comfort

If your current cooling or heating system is more than 10 years old, upgrading to an eco-friendly system will not only reduce your family's energy use, but can also help you save money on utility bills. Talk to your Whirlpool® Home Cooling & Heating dealer about which high-efficiency products are the best options for your home.

Whirlpool Gold® W4GC8 18 SEER Air Conditioner

Whirlpool Gold® W4GH8 18 SEER Heat Pump

A High-Efficiency Compressor with R410A Refrigerant

The two-stage compressor is capable of capacity reduction, which provides improved temperature control and greater energy savings than a standard compressor. It uses the new, environmentally friendly R410A refrigerant.

B Variable Speed Condenser Fan

Features swept-wing fan blades for sound reduction and increased efficiency.

C Louvered Cabinet

Full metal jacket panels provide coil protection and are simple to remove with just two screws.

D Factory-Installed Refrigerant Filter Drier

Provides superior refrigerant system protection.

Comfort Alert II™ Diagnostic Module

Allows a service technician to diagnose unit problems more efficiently and effectively.

Compressor Sound Blanket

This heavy-duty sound jacket significantly reduces compressor sounds, providing a quieter unit.

Raised Coil

Prevents debris from collecting along the bottom of the coil and restricting air flow.

All specifications are subject to change.

A High-Efficiency Compressor with R410A Refrigerant

The two-stage compressor is capable of capacity reduction, which provides improved temperature control and greater energy savings than a standard compressor. It uses the new, environmentally friendly R410A refrigerant.

B Variable Speed Condenser Fan

Features swept-wing fan blades for sound reduction and increased efficiency.

C Louvered Cabinet

Full metal jacket panels provide coil protection and are simple to remove with just two screws.

D Compressor Discharge Muffler

Provides quieter operation during the heat cycle.

E Factory-Installed Refrigerant Filter Drier

Provides superior refrigerant system protection.

Defrost on all W4GH8 Heat Pumps

The Quiet Partner™ capable defrost system allows for a quieter defrost during the heat cycle.

Compressor Sound Blanket

This heavy-duty sound jacket significantly reduces compressor sounds, providing a quieter unit.

Comfort Alert II™ Diagnostic Module

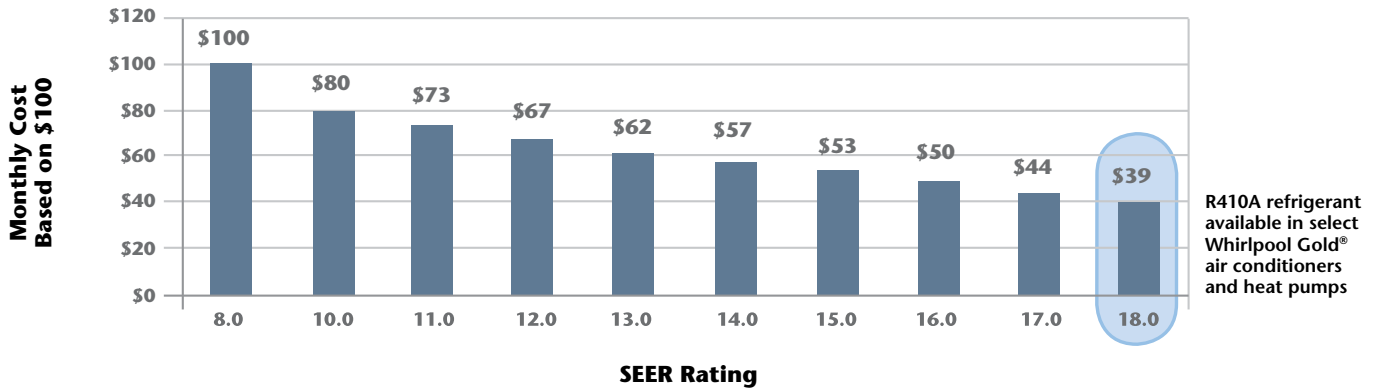

Allows a service technician to diagnose unit problems more efficiently and effectively.

All specifications are subject to change.

Superior Indoor Comfort and Energy Savings

Keep your indoor temperature pleasant year-round with an 18 SEER Whirlpool Gold® air conditioner or heat pump—**our most energy efficient units**. Both the 18 SEER air conditioner and heat pump use the environmentally friendly refrigerant R410A. This chlorine-free refrigerant is not only better for the environment, it also transfers heat more efficiently.

Seasonal Energy Efficiency Ratio (SEER) Rating to Cost Savings Comparison Chart*

What Is SEER?

The efficiency of air conditioners and heat pumps is determined by the SEER rating. The higher the rating, the more energy efficient the product is and the greater the potential for savings on energy costs. If your current air conditioner is more than 10 years old it most likely has a SEER rating of 10 or less.

The chart above shows examples of potential energy savings. For every \$100 spent to cool your home with an 8 SEER air conditioner an 18 SEER unit would cost approximately \$39. Actual savings will depend upon the efficiency of your current system. To figure specific savings information for your household, use the energy calculators and software at the energysavers.gov website.

Also, check to see if your local utility company offers a rebate program for the purchase and installation of an ENERGY STAR® qualified air conditioner.

Quiet Operation

Enjoy quiet comfort. The fan blades on the W4GC8 series air conditioners and W4GH8 series heat pumps are specially designed to reduce noise. A swept-wing blade with serrated edges reduces turbulence and enhances performance. In addition to its heavy-duty compressor sound blanket, the two-stage compressor is potentially up to four times quieter than a reciprocating compressor. The W4GH8 heat pump also offers Quiet Partner™ technology for reduced noise levels during the defrost cycle.

*The SEER to Operating Cost Comparison is for illustrative purposes only. Your energy savings may vary due to equipment installation, climate conditions, utility rate programs and/or your lifestyle.
