

# Packaged Gas/Electric Comfort Systems

## Right for You

How can we say that Payne knows what's right for you? The answer is experience. D.W. Payne and sons started making the right products for their west coast customers back in 1914. Since that time, we've expanded nationwide with a brand that provides attractive, affordable products that work. These same principles apply to our family of packaged gas/electric comfort systems. Because this solid lineup of comfort equipment carries the Payne name, you can be sure it's the right product at the right price.

## One Package, Complete Comfort

In the dead of winter or the scorching heat of summer, it's great to know you can step inside, sink into your favorite easy chair and enjoy soothing comfort. All year long, Payne packaged gas/electric comfort systems deliver the comfort you deserve with the durability and reliability you expect. At the same time, you can count on Payne for affordability, energy efficiency and enhanced indoor air quality all in one convenient package.

Starting with the rugged base, these units are built from the ground up to withstand Mother Nature's worst, resisting corrosion to ensure lasting product integrity. And because packaged systems include components typically found inside the home in traditional split-system gas/electric comfort systems, lasting durability isn't a luxury – it's a requirement.

## A True Energy Star

One way to compare products from different manufacturers is to check their efficiency ratings. The Payne PY3P packaged gas/electric comfort system offers 13 SEER (Seasonal Energy Efficiency Ratio) cooling efficiency and 81% AFUE (Annual Fuel Utilization Efficiency) heating efficiency. Like miles-per-gallon for a car, SEER and AFUE ratings can be interpreted simply – the higher the number, the better the efficiency. At those ratings, this model easily outperforms an older, less efficient model you may be replacing.

When you choose Payne you also choose to breathe a little easier. The PY3P packaged gas/electric comfort system provides outstanding moisture control to keep your indoor air as clean and pollutant-free as possible. Now that's a feature you can get comfortable with!

## Payne is the Right Choice

Payne offers the right products at the right price, offering dependable, comfortable and efficient comfort season after season. So make the decision easy on yourself – choose Payne. When you do, you're choosing a long-standing history of indoor comfort products that are just right for you.

## Our Warranty

The Payne PY3P is covered with a five-year limited parts warranty. The heat exchanger is covered by a 10-year limited warranty. Ask your Payne dealer for details.

## What You Get With Payne

### 1 Lasting Cooling and Performance

When your system is cooling, air passes through a condenser coil, exposing it to any number of airborne corrosive agents. Payne condenser coils maximize heat transfer needed for air conditioning with a large surface area and minimize damaging corrosion with copper tubing and aluminum fins.

### 2 Smooth, Efficient Operation

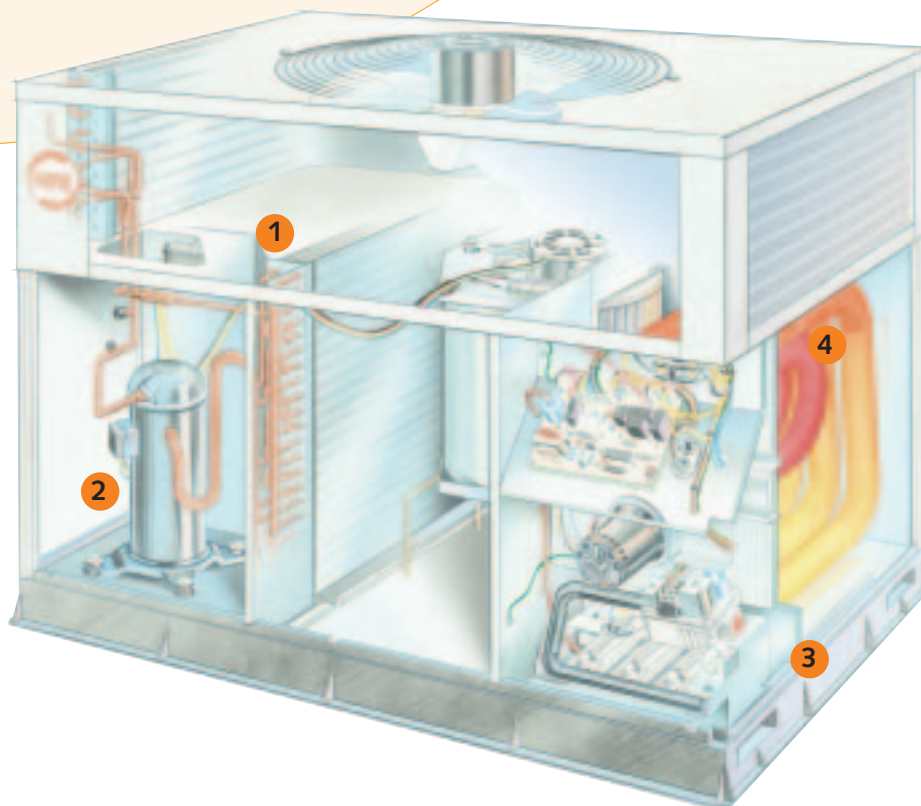

The heart of your cooling system, this rugged compressor provides years of economical cooling with its durable construction and smooth-running design.

### 3 Enhanced Indoor Air Quality

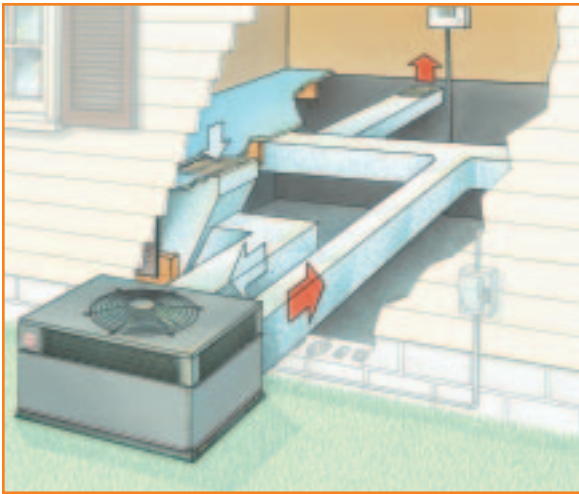

Our durable, composite base offers a solid, rust-free foundation for your comfort, while providing superior drainage and moisture control. By minimizing moisture inside the cabinet, we minimize the opportunity for growth of bacteria, mold, algae and other potential sources for airborne pollutants.

### 4 Warm Up to Efficient Heating

Our Turbo-Tubular™ heat exchanger optimizes heat transfer and energy efficiency by allowing heated gases to make multiple passes across supply air before it's delivered to your living spaces. A tough, corrosion-resistant aluminum coating provides longer life.

## Your Reliable Comfort Connection with Payne

Payne packaged comfort systems are designed with built-in mountings for solid, reliable installation on the ground or on a roof. Either way, you can expect long-lasting comfort and money-saving value for years to come.

## Install Now, Pay Later with Payne Financing

If you're like many people, your need for comfort doesn't always match your immediate ability to pay for it. So Payne makes your life easier with 90 days of no-interest financing. Pay it off in 90 days, and pay no interest. Or, spread your payments over time with a reasonable finance charge. Either way, you can enjoy comfort now, when you need it.
